The first time I played Rome 1, finally defeating the Gauls after a sluggish offensive, I was astounded to discover I could step into their shoes. One of the most consistent complaints about the Total War: Warhammer series are the repetitive siege battles, which can often feel like a bit of a chore. More like this: The best Total War: Warhammer 2 DLC If you need any indicator of how extensive the changes are, a full 54 page summary can be found on their Steam page. With Warhammer's far spread races, this really does allow for unique start positions, whether a Wood Elf desert campaign from Oreon's camp, or a Dwarf jungle campaign on the Spine of Sotek. Not to mention supporting that idea through their inter-game (and biggest ever) grand campaign, Mortal Empires. It's a wonderful time. Kislev is one of the confirmed Warhammer 3 races, and there's a sub-mod for this that will make it compatible with SFO's overhaul mod, mentioned below. TOTALLY RANDOM TOTAL WAR GENERATOR BY KRUBERMORGEN Start positions have long been a gripe for the Total War: Warhammer community — it took years for us to get a unique start position for Ungrim Ironfist, and only in the last Empire update did Balthazar Gelt finally receive his own (a mere three years after the release of the first game). Not every game has them (Civ 6, for example, is oddly absent of cheat codes), but plenty others do. Here are some useful Medieval 2 cheats: add\_population [settlement name] [amount] - adds the specified amount of population to the desired settlement. CRYNSOS FACTION UNLOCKER+ BY CRYNSOS Do you remember back when simply defeating a faction in Total War would let you play as them? But a touch extra variety never hurt anyone. The mod essentially allows you to play as Kraka Drak, the Dwarf faction which exists in Norsca, with both unique units and unique lords. You can use a negative value to remove pop add\_money [amount] - gives you the desired amount of money. The scale and success of SFO really is a testament to the continued drive and passion of the Warhammer modding community. MIXU'S LEGENDARY LORDS BY MIXU It wouldn't be an exaggeration to say Mixu's Legendary Lords 1 and 2, represent the peak of lord modding in Warhammer. Total War: Warhammer 2's modding community is, at its heart, a collaborative effort, as creators work together, adding hundreds of hours of replayability to the series, while also working to realise the in-game fantasy world. Setting the amount, experience, and armour/weapon levels is optional process; cq [settlement name] - completes all pending construction work at specified settlement control [faction name] - switches the faction you are playing as to the chosen faction. Or actually it would be more accurate to say they are a very real worry of the present, as the mod changes every faction start position in the game. Needs careful timing if you want to use it on one of your own battles bestbuy - toggles a cheat that makes everything 10% cheaper disable ai [ai type] - will either disable all AI, or just the specified AI jericho - causes walls to crumble in siege battles Total War: Medieval 2 cheats - ancillaries and traits Like its predecessor Rome: Total War, Medieval 2 makes use of special characters - whether they be generals or agents. You can insert [faction name] before the value to give money to another faction instead. They also often fill a gap in terms of campaign playstyle — I played a fantastic cavalry-focused Tomb Kings campaign with King Tutankhanut from Legendary Lords 2. While I love a challenge, and sending heretics howling back into the Warp, I don't always feel like putting my campaign on hold for a good thirty or so turns while I deal with it. Chaos Invasion Choice by Crynso's does exactly that, prompting you at the start of a campaign as to when (or if) you want a Chaos invasion at any point in your campaign. You can use the following commands to add/remove traits and ancillaries: give\_ancillary [character name] [ancillary id] remove\_ancillary [character name] [ancillary id] give\_trait [character name] [trait id] [level] remove\_trait [character name] [trait id] - this can remove all traits if you don't specify a specific trait ID If the character name has a space in it, put it in quotation marks (e.g. "name"). As you might expect from Lizardmen suddenly teleported into the middle of Norsca, the results are often violent and unpredictable, as the AI tries to comprehend what's happening. That's it. Medieval 2: Total War is still pretty popular, even after all this time, and being an older Total War game it still retains that more hardcore sensibility that can make it extremely tough at times. Battle Chants In the vanilla game, a unit can start chanting if it successfully routs or destroys an enemy unit. But the Games Workshop lore surrounding the Norse Dwarfs didn't go so far as expanding on characters or units, so Cataph created them — in a similar fashion to what CA did for the Vampire Coast, creating new units, and a new lord in Cylostra Drefinn. They add a huge amount of variety to your in-game experience, allowing you to battle on siege maps more akin to Medieval II — multi-layered and filled with possibility, as well as granting the Warhammer locations the epic feel they deserve. They have created a collaborative vision of Total War: Warhammer, compiling some of the best mods to create a version of the game which is distinctive in its own right — with new units, factions, buildings, and visuals. Focusing on a player experience 'closer to the lore and Warhammer universe', the SFO team is made up of 10 community modders, each with their own speciality, united by their love of Warhammer Fantasy. CATAPH'S KRAKA DRAK: THE NORSE DWARFS 2.0 BY CATAPH While Cataph's Southern Realms mod is also great, I think Kraka Drak: the Norse Dwarfs 2.0 demonstrates something brilliant that Total War: Warhammer modders are doing. auto\_win [attacker / defender] - will make either the attacker or the defender win the next auto-resolved battle. It won't blow the lid off your next Warhammer 2 run, but these kind of lower-level ambient tweaks can really help with the immersion in the tactical space. That's the mod. In the background you spy an expansive city, with streets and alleyways, places for chokepoints and layered defences, but you can only ever access a small portion of the map. The Dryrain Reskins by Hooveric are a beautiful, yet subtle series of visual enhancements for units, lords and heroes, focusing on 'lore-friendly realism', adding another layer of depth to an already deep game. Total War: Medieval 2 cheats Like most games, you can access the command console by pressing the tilde (~) or equivalent key on your keyboard. GCCM: SETTLEMENT PACKS BY GCCM You may be thinking, what is a settlement map overhaul doing in the quality of life section? Characters can have different traits, as well as special 'ancillaries' that modify stats. Admittedly, recent games do seem to be bringing this feature back (in Three Kingdoms you have to defeat Dong Zhuo to play as him) but no such feature exists in Total War: Warhammer II. But never fear - cheat codes are here! Whether you need to give yourself more money, or give one of your characters a specific trait, there's plenty of options to make your game easier. It introduces new lords, five heroes, as well as 30+ units and eight Regiments of Renown. It's easier to get bored of a generic barbarian faction, in a game with many generic barbarian factions, than it is in a game with giant spiders, killer bats, undead wolves, walking shipwrecks and exploding corpses etc. We haven't included anything that involves editing game files, as that's more akin to modding than using a traditional 'cheat'. character\_reset - resets a character back to the settings they had at the start of the current turn move\_character [character name] [x] [y] - moves specified character to chosen coordinates, which can be found via the show\_cursor command surrender\_regions [faction name] - will surrender all regions belonging to the chosen faction to the rebel faction. Battle Chants is a simple mod that increases the frequency of the various chanting sound effects, as well as idle chatter. You can optionally specify a level for a trait to be, although by default it will be level 1. This mod features a range of units, technologies, and building chains that make for a distinctive campaign experience. DRYRAIN RESKINS BY HOOVERIC Visual variety in units is far less of a problem in fantasy games than it is in historical. Below, we've assembled a list of our favourite mods. Using console commands to get a leg up in videogames is a time honoured tradition, although it seems to be more commonly associated with strategy games given their nature. SFO: GRIMHAMMER II BY THE SFO MOD TEAM In terms of mods that change every aspect of the vanilla game, you owe it to yourself to look up SFO: Grimhammer II. This represents a unique opportunity for modders, who can now create ongoing content spanning a whole trilogy, as well as drawing from the extensive lore of Warhammer Fantasy to introduce game elements that CA may never have the chance to due to time, money etc. Related: The best strategy games on PC However with Crynso's Faction Unlocker you can play as any faction in both Mortal Empires and the Vortex Campaign. These characters come with special abilities, mounts, and a level of professional polish, that in some cases, often makes you question whether they are actually the real thing. You'll need Mixu's Unlocker to actually be able to play as this faction and enjoy the new units, although according to the creator the AI is also capable of recruiting the new options as well. TOTAL WAR: WARHAMMER 2 MODS These are the best Total War: Warhammer 2 mods: Expanded Roster - Kislev Reborn Crynso's Faction Unlocker+ Battle Chants Dryrain Reskins Totally Random Total War Generator Chaos Invasion Choice GCCM: Settlement Packs Mixu's Legendary Lords Cataph's Kraka Drak: the Norse Dwarfs 2.0 SFO: Grimhammer II Expanded Roster - Kislev Reborn If like us you're very excited for Total War: Warhammer III, then this mod might just give you the fix you need while you wait. For a full list of ancillary and trait IDs, as well as their effects, check out this handy resource which also gives examples. Using a negative value removes money toggle\_terrain [terrain display id] - changes the way the map terrain is displayed in game toggle\_fog - toggles the fog of war on/off create\_unit [settlement / character name] [unit id] [amount] [experience] [armor] [weapon] - a complicated command, this will create the desired unit within the chosen settlement or character's army. For some, like Boo!, this isn't enough. A special shoutout to Steam user Sir\_Calcium1066, who put together a more comprehensive guide on the subject. With one of my favourite Total War mods, the wonderfully named Totally Random Total War Generator, your start position worries are a thing of the past. It's also benefit from the fact that in Total Warhammer, Creative Assembly committed to a dozen consecutive series of games rather than individual games from select time periods. Hear me out. So, you want some Medieval 2: Total War cheats? Kislev Reborn which massively expands the Kislev unit roster in Warhammer II to be more up-to-date with current lore and sourcebooks. CHAOS INVASION CHOICE BY CRYNSOS There's nothing more annoying than being in the middle of a gripping campaign, but then having to drop everything for the Chaos Invasion. Total War has always been a series which has attracted modders, and the Warhammer 2 mod scene is thriving as a result of this long legacy. The GCCM: Settlement Packs are compilation mods bringing together creations from some of the most prominent Total War: Warhammer map modders. Not to mention that Kraka Drak, in my opinion, is one of the most interesting, yet unavailable, start positions in the vanilla game. Some add simple quality of life changes, while some - like the massive SFO - are drastic overhauls that affect nearly every aspect of the game. They add a huge variety of unique lords and heroes to the game - both characters we were likely never to see, such as Elspeth Von Draken (and her Carmine Dragon) and those long requested, such as Taurox the Brass Bull. We've put together this guide to cheats and console commands for the game, to help give you a leg up. Pressing the up arrow will bring back your most recent input. There is also an impressive sub-mod collection you can browse here.
